About Me

I am Jahanvi Tyagi, a highly motivated and detail-oriented final-year MCA student with a strong foundation in software development and web technologies. I have hands-on experience in developing applications using the MERN stack and have worked on projects such as a hospital management system and Real Time Chat Application. I am eager to apply my skills in real-world environments and contribute to innovative software solutions. Currently seeking internship or entry-level opportunities to enhance my professional experience and grow in the IT industry."

Projects

Project Name: E-Commerce Application

Duration: 3 months

Team Size: 4 members

Technologies Used: MERN Stack (MongoDB, Express, React, Node.js)

Description:

An eCommerce project that enables users to browse, search, and buy products online, featuring secure payments and a responsive design for seamless shopping across devices.

Project link: <https://mern-ecommerce-2bhn.onrender.com>

Project Name: Hospital Management System

Duration: 4 months

Team Size: 5 members

Technologies Used: MERN Stack (MongoDB, Express, React, Node.js)

Description:

Developed a hospital management system to manage patient records, appointments, and billing. Used the MERN stack to create a secure, user-friendly platform with role-based access for doctors, patients, and administrators.
